	OTES:
D	iscussing - raft - Analytic Blueprint
	eeting with Sierra Club
(Overview of Analytic Blueprint, highlighting change to the Overall and Regulatory approach.
c	omments on the Analytic Blueprint due by COB on Wednesday March 30, 2011.
-	Iso need to have your Enforcement Survey comments by COB on Wednesday March 30, 2011. n Thursday March 24, the Sierra Club, and others (Earthjustice, Environmental Integrity Project, Humane Society, Waterkeeper) met with Lynn Beasley,
C	and Howland and Tim Sullivan. The Sierra Club asked for the meeting so that they could get an update on the progress of the rule. We let them know that ptions selection was to take place in late April/early May timeframe and that was the time that upper management would weigh-in on their preferred Options
16	as the proposed rule. (Ontions would not go out as an Advance Notice of Proposed Rulemaking). Of concern was the continuous release reporting rules and
10	that farms report a very broad range of releases in order to avoid reporting seasonal spikes in their releases.* The group was also concerned that there is not an active the complete picture of what is released. For example, they would like to have some sporting of manure handling practices, and they would like the Agency to be clear that changes in operations at the farms will change reporting.
r	noted that too broad release ranges are a problem in other industries too.
